With pleasure. Maybe we bring in Jan Angel for this as well.

E.g. What is our process to share the science beyond the SAB?  
What will the consumer and public see and hear?  
How does our consumer comm research and validation fit into surveillance?  
What will be published at time of a potential claim?

These are just some messages I think the SAB would like to hear for better understanding what will happen next year,

What about the JLI communication plan? The SAB expressed interest in our framework plans, has I not? It would be possible to present to them a general topline version of the Best Practices with the comm plan being an element in it.

I suggest this to you because of the emphasis put on the BP by our senior management and the very positive reception of the BP presentation at the Sharing Meeting yesterday.

Let me know what I can help with for the meeting.
